Vinícius Fontanella Kleis

Full Stack Developer

Joinville, SC, Brazil | +55 47 98900-2144 | fontanella.vinicius@gmail.com | linkedin.com/in/vinicius-fontanella | github.com/fontanella01

SUMMARY

Full Stack Developer who delivers SaaS products end to end: from the database (PostgreSQL and Oracle) to React and TypeScript interfaces, including APIs, Meta integrations and generative AI features. I also own production support, with root cause analysis and L2/L3 ticket resolution. Solid background in data, ETL and BI. Undergraduate in Systems Analysis and Development, with advanced English.

PROFESSIONAL EXPERIENCE

Full Stack Developer (Contractor) · Volúpia Digital / Infoprotect *Jun 2026 – Present*

- Development and evolution of a **multi-tenant SaaS CRM** (React, TypeScript, Supabase/PostgreSQL).
- **L2/L3 support and maintenance**: analysis and resolution of customer tickets (bugs, data and permissions), with root cause analysis, production fixes and documentation.
- **Third-party API integrations**: Meta (WhatsApp, Instagram, Ads), webhooks and electronic service invoices (NFS-e).
- **Generative AI (LLM) features**: assistants, personalized recommendations and automated reports.
- **Analytics dashboards** with business rules and optimized database queries.
- Delivered an **online learning platform (LMS)** for a client, including the migration of about 7,000 users.

Operations Planner · Orbenk *Oct 2025 – May 2026*

- Built integrations for process automation and data consumption.
- Maintained and improved internal web interfaces and features.
- Designed ETL processes to clean, integrate and standardize data.
- Created Power BI dashboards and KPIs to track operations.

Database Intern · Byseven *Feb 2025 – Jul 2025*

- Monitored and maintained Oracle database environments (backup, availability and integrity).
- Developed data integration and processing routines to automate internal processes.

Data Assistant · Neogrid *Feb 2024 – Oct 2024*

- Collected, organized and processed data for operational reports.
- Automated data handling steps, reducing manual work.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, SQL, HTML and CSS
Front-end: React, Vite, Tailwind CSS
Back-end: Node.js, REST APIs, Supabase (Edge Functions, auth, Row Level Security)
Databases: PostgreSQL, Oracle Database, MySQL
AI and integrations: LLM integration, Meta APIs (WhatsApp, Instagram, Ads), webhooks
Data and BI: ETL, data quality, Power BI
Support: L2/L3 support, root cause analysis, production fixes
Tools: Git/GitHub, Linux, Zabbix

EDUCATION

Systems Analysis and Development — SENAC, in progress (expected 2027)
Law (LLB) — FGG, 4 years completed, on hold

COURSES AND LANGUAGES

English: advanced (B2) · **Portuguese:** native · **Courses:** Oracle Database Essentials, Oracle Database – Advanced Topics, Linux Fundamentals
